Attn: Chris Richardson

Dear Chris,

I wanted to let you know how useful your camera system has been to my company. It certainly does pay to have a second set of eyes watching your business.

Your system has assisted me in detecting employee theft, customer theft and helped the Orange Police Department in a shooting that happened outside our building. I will also mention that the police department was extremely impressed with how easy your system was to operate -from archiving data to downloading it and putting it on disc. The detective said it was one of the better systems he has seen.

I also wanted to mention how professional and courteous your staff has been since we've started with VMS. It certainly has been a delight to deal with yourself as well as your technical support people and the installation crew. Thanks for all your help.

Regards,

Brian Monteverdi
Vice President
