VMS is not just a vendor that my company uses, but they are part of our team. There are a lot of companies out there who say they can provide you with a CCTV system, but I promise you that there is no one out there who can provide you with the level of service that VMS will.

Time and time again they have gone out of their way to do what ever I have asked of them. If I call for either tech support or to place an order, the phone call is treated with the same respect. VMS has my business and they do everything that they can to make sure I stay happy. In the end I always feel like I am calling a friend who wants to help and not some nameless soul who is there to route my call.

In order to protect the assets of your company you need to make sure you draft the right players for your team. Visual Management is my franchise player and they can be yours too.

Sincerely,

A handwritten signature in blue ink that reads "Jim".
